

HUMANITY + AI, INC. • 501(c)(3) NONPROFIT

AI Builders Academy

After-school artificial intelligence program for grades 3–12

Students learn to build with AI — not just use it.

[School partnership overview](#)

Launching Fall 2026 • Pinellas County, Florida

Why this program, why now

Every career

The students in your building will enter a workforce where AI is a default tool, not a specialty.

Very few schools

Structured, age-appropriate AI instruction is still rare — especially outside of magnet and private programs.

Use vs. build

Most kids already use AI. Almost none understand how it works, where it fails, or how to build with it.

Our mission is to make artificial intelligence accessible to everyone — starting with the students who will inherit it.

The program at a glance

6

Weeks per cohort

1

Class per week
90 minutes

20

Students maximum
per class

3–12

Grades served, in
three separate bands

How a session runs

1

Warm-up concept
15 min

2

Guided build
40 min

3

Team challenge
25 min

4

Share & reflect
10 min

ONE PROGRAM, THREE CURRICULA

Built for the age in the room

ELEMENTARY • GRADES 3-5

AI Explorers

*Discover. Create.
Innovate. Together!*

Playful, screen-light introduction. Kids meet AI through storytelling, art, games and team challenges — and learn what it means to be safe and kind online.

Printed flyer
available for
family takeaway

MIDDLE SCHOOL • GRADES 6-8

AI Builders

Think. Build. Impact.

Concepts get real. Students train models, write prompts with intent, touch Python and block code, and ship projects that solve a problem they picked.

Printed flyer
available for
family takeaway

HIGH SCHOOL • GRADES 9-12

AI Builders

*Real skills. Real projects.
Real impact.*

Portfolio work. Python, machine learning, data science and ethics culminate in a capstone the student can show a college or an employer.

Printed flyer
available for
family takeaway

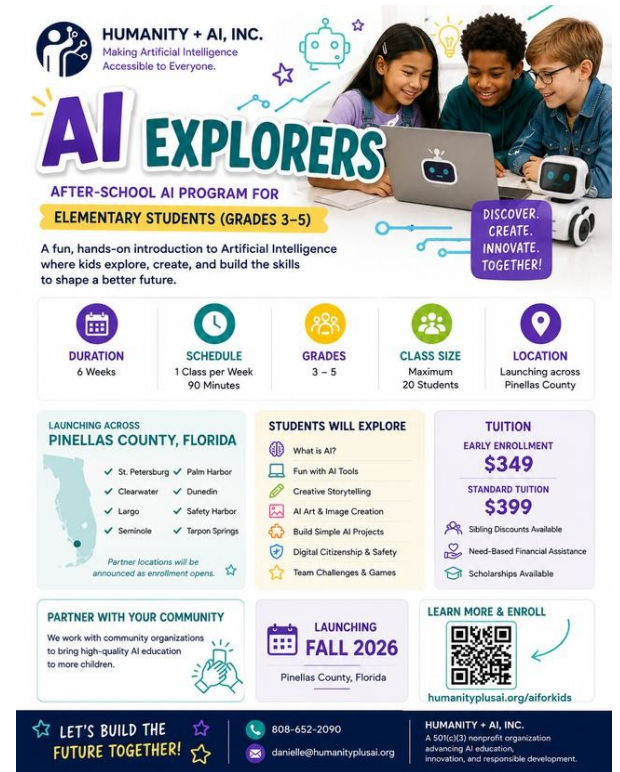

AI Explorers — elementary

Students will explore

- What is AI? — how machines "learn"
- Fun with everyday AI tools
- Creative storytelling with AI
- AI art and image creation
- Building simple AI projects
- Digital citizenship and safety
- Team challenges and games

What it feels like in the room

Low-pressure and hands-on. Kids name what AI is good at and where it gets things wrong, make something they are proud to show a parent, and leave with language for talking about technology safely. No prior computer experience is assumed or required.

HUMANITY + AI, INC.
Making Artificial Intelligence Accessible to Everyone.

AI EXPLORERS

AFTER-SCHOOL AI PROGRAM FOR
ELEMENTARY STUDENTS (GRADES 3-5)

A fun, hands-on introduction to Artificial Intelligence where kids explore, create, and build the skills to shape a better future.

DISCOVER. CREATE. INNOVATE. TOGETHER!

DURATION 6 Weeks	SCHEDULE 1 Class per Week 90 Minutes	GRADES 3 - 5	CLASS SIZE Maximum 20 Students	LOCATION Launching across Pinellas County
----------------------------	---	------------------------	---	--

LAUNCHING ACROSS PINELLAS COUNTY, FLORIDA

- ✓ St. Petersburg ✓ Palm Harbor
- ✓ Clearwater ✓ Dunedin
- ✓ Largo ✓ Safety Harbor
- ✓ Seminole ✓ Tarpon Springs

AI Builders — middle school

Students will learn

- AI fundamentals and how it works
- Machine learning basics
- Prompt engineering
- Python and block-based coding
- Data and real-world applications
- AI ethics and digital responsibility
- Building AI projects that solve problems
- Collaborating, presenting and leading

Hands-on projects

- Train an AI image classifier
- Build a working chatbot
- AI-powered game design
- Create a smart invention
- Analyze data and make predictions
- Design a solution for your community

AI Builders — high school

Students will master

- AI fundamentals
- Python and advanced coding
- Machine learning and data science
- Prompt engineering
- AI ethics, bias and responsibility
- Building AI-powered apps and websites
- Data analysis and visualization
- Capstone project and presentation
- College and career pathways in AI

The capstone

Each student ships one real project — a chatbot, a computer-vision tool, a predictive model, an AI-powered app, or an AI-for-social-good solution — and presents it at a public showcase for families and community partners.

HUMANITY + AI, INC.
Making Artificial Intelligence Accessible to Everyone.

AI BUILDERS ACADEMY

AFTER-SCHOOL AI PROGRAM FOR HIGH SCHOOL STUDENTS (GRADES 9-12)

Go beyond the classroom and build the future. Learn real-world AI skills, create innovative projects, and prepare for college, careers, and tomorrow.
CODE. CREATE. SOLVE. LEAD.

REAL SKILLS. REAL PROJECTS. REAL IMPACT.

What we provide your school

Curriculum & projects

Complete six-week scope and sequence, lesson plans, and all project materials.

Instructors

Trained, vetted instructors who run the sessions. Your staff do not teach the content.

Insurance

We carry our own coverage for the program. Certificates provided on request.

Registration support

Enrollment, rosters, payment processing and waitlists are handled by us.

Marketing materials

Grade-specific flyers, digital assets and family-facing copy, co-branded with your school.

Parent communication

Welcome letters, weekly updates, and a direct line for family questions.

Materials & resources

Devices and software guidance, printed workbooks, and take-home extensions.

Ongoing support

A named program contact, mid-cohort check-ins, and end-of-program evaluation.

Flexible partnership options available — host site, co-hosted, or full-service delivery.

Leadership and credentials

Danielle A. Franklin

Founder & CEO, Humanity + AI, Inc.

- Former NVIDIA
- 20 years supporting the U.S. Department of Defense
- Founder, Doolittle Corporation
- Developer of ROSIE, an applied AI research platform

Instructor standards

- Background-checked before any student contact
- Trained on our curriculum and classroom protocols
- Experience teaching or mentoring school-age students
- A second adult present for every session

About Humanity + AI

A 501(c)(3) nonprofit advancing AI education, innovation and responsible development. Our programs span AI literacy, ethics and governance, accessibility, and applied research — the academy is how that work reaches the next generation.

Tuition families actually pay

TUITION

\$399

Full six-week program.
All materials included.

COHORT DATES

Fall 2026

Exact start dates are confirmed
with each partner school.

**No family turned
away for cost**

- Sibling discounts
- Need-based financial assistance
- Scholarships available

For your families

Tuition is paid directly to Humanity + AI — your school never handles money for this program. Scholarship requests are reviewed by us, confidentially, and families apply through the same enrollment form. Schools may also sponsor seats for students they identify.

Launching Fall 2026 across Pinellas County

Launch communities

- St. Petersburg
- Clearwater
- Largo
- Seminole
- Palm Harbor
- Dunedin
- Safety Harbor
- Tarpon Springs

Partner locations announced as enrollment opens.

Getting started

- 1 Intro meeting**
30 minutes — fit, grade bands, room and schedule
- 2 Partnership agreement**
Scope, dates, insurance certificates, logistics
- 3 Family launch**
Co-branded flyers go home; enrollment opens online
- 4 Cohort begins**
Six weeks later: showcase night for families

Lead time we need

Roughly eight weeks between a signed agreement and the first class — enough to staff instructors, print co-branded materials, run family enrollment, and reach a workable class size. Earlier conversations mean better placement in the fall schedule.

LET'S BUILD THE FUTURE TOGETHER

Bring AI Builders Academy to your school

The next step is a thirty-minute conversation. We will walk your team through the curriculum, answer questions about insurance and staffing, and see whether a fall cohort fits your calendar.
